Jade Starter Kit

The Jade Starter Kit is a modular system comprised of the XXS Terminal board, which offers several interfaces and the push fit XXS Video board based on the ARM926EJ-S, which carries the MP86R01 Jade device itself. The Jade Starter Kit constitutes a powerful, low consumption development and evaluation platform for the latest Graphics Controller from Fujitsu. The Jade Starter Kit includes GCC/GDB/GLIBC Tools and Linux BSP (Kernel 2.6.22).

Interfaces:

- USB (Host, Type A Connector)
- SD Card
- CAN RX/TX (Controller Area Network)
- UART
- JTAG (for ARM debugging)
- Ethernet
- DVI-I (Digital Video Interface - Integrated)
- Digital RGB output
- CVBS video input
- Line input
- Microphone input
- Headphone output
- Line output
