

Cypherbridge Systems Partners with Ultimate Solutions on Distribution Agreement

Carlsbad, CA and Tewksbury, MA – April 4, 2011 – Cypherbridge Systems, a technology R&D firm, announced a partnering agreement with embedded tools provider, Ultimate Solutions. Under this agreement, Ultimate Solutions will now be distributing Cypherbridge's Embedded Security and Device Management solutions in North America.

Steve DeLaney, President of Cypherbridge Systems, has seen continued demand for these solutions as secure communications in embedded systems become increasingly important to customers, product managers, and design engineers.

"We are excited to partner with Ultimate Solutions as we continue to expand our market and software product lines. Ultimate Solutions is a solid well-established distributor with broad reach in the industry, providing a single channel with a wide range of embedded development tools. Together, we can now supply developers with a comprehensive source for embedded software development tools, security software, FPGA cores, and embedded content serving stacks all under one roof."

According to Peter Tympanick, Product Manager with Ultimate Solutions, Cypherbridge products such as uLoad secure boot loader, uSSL public-key infrastructure and uSSH encryption SDKs, will become common requirements for many of the company's customers:

"The timing is right for Ultimate Solutions to offer a robust suite of software development tools to address this market. Our customers have come to rely on USI to stay ahead of the curve with regards to development tools," says the Product Manager, who sees the alignment with Cypherbridge as helping the company achieve this objective.

About Cypherbridge Systems

Cypherbridge Systems, a technology R&D firm based in Carlsbad, CA, was established in 2005 to develop software, server, security, device and system level products. Their product portfolio includes security and device management solutions to enable a broad range of connected device applications, integrating embedded device, communications networks, and back office servers for interoperable, scalable and secure end-to-end systems. About Ultimate Solutions, Inc.

Ultimate Solutions, a Massachusetts based company was founded in 1999 with a vision to provide developers of embedded systems with a single channel to procure a wide spectrum of professional grade development tools. USI's product lines target the most commonly used general purpose CPUs and programmable DSPs available in the market today. Over the years, USI has established itself as the leading supplier of development tools for the embedded Linux market. In 2007, the company developed and released the industries first Eclipse based debugger optimized for use with GDB and Abatron's BDI2000/3000 series of BDM/JTAG probes. In the years to follow, USI is committed to expanding its products and support services to meet the demands of tomorrow's embedded developers.
